Digital Health and Innovation Department

World Health Organization

# Global Initiative on AI for Health

AI is already playing a role in diagnosis and clinical care, drug development, disease surveillance, outbreak response, and health systems management ...

The future of healthcare is digital, and we must do what we can to promote universal access to these innovations and prevent them from becoming another driver for inequity.

- Dr Tedros Adhanom Ghebreyesus  
WHO Director-General

# Global Strategy on Digital Health

## S01.

Promote **global collaboration** and advance the **transfer of knowledge** on digital health

## S02.

Advance the **implementation** of national digital health strategies

World Health Organization

SEVENTY-THIRD WORLD HEALTH ASSEMBLY  
Agenda item 18.6

WHA73(28)  
13 November 2020

### Global strategy on digital health

The Seventy-third World Health Assembly, having considered the consolidated report by the Director-General<sup>1</sup> and the draft global strategy on digital health,<sup>2</sup> decided:

- (1) to endorse the global strategy on digital health;
- (2) to request the Director-General to report back on progress in the implementation of the global strategy on digital health to the Seventy-sixth World Health Assembly.

## S03.

Strengthen **governance** for digital health at global, regional and national levels

## S04.

Advocate **people-centered health systems** that are enabled by digital health

# Objective 3 of the Global Strategy on Digital health and Digital Health Competencies

S03

Strengthen **governance** for digital health at global, regional and national levels

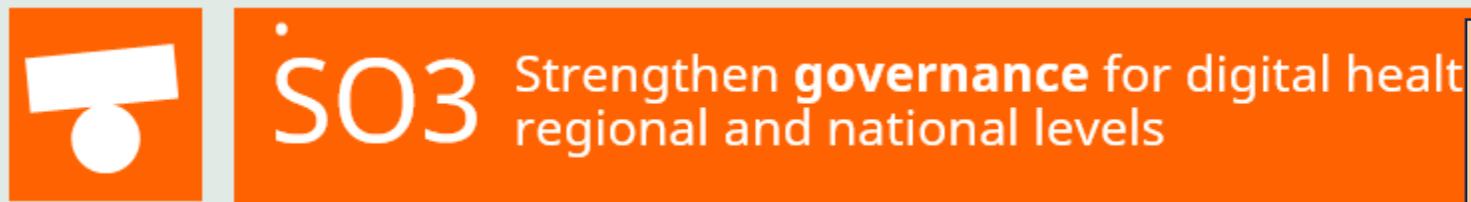

Policy actions ...

3. promote and facilitate **digital health competencies in the education and training curricula** of all health professionals and allied workers; and

4. promote **capacity-building** for leaders of public health authorities, affiliated agencies and **policy-makers** to take informed decisions to support digital health investments.

# Objective 3 of the Global Strategy on Digital health and Digital Health Competencies

Policy actions ...

3. promote and facilitate **digital health competencies in the education and training curricula** of all health professionals and allied workers; and

4. promote **capacity-building for leaders of public health authorities, affiliated agencies and policy-makers to take informed decisions to support digital health investments.**

## Digital literacy, skills and capacities

12. To fully harness the benefits of digital connectivity we must ensure that people can meaningfully and securely use the Internet and safely navigate the digital space. We recognize the importance of digital skills and lifelong access to digital learning opportunities, taking into account the specific social, cultural and linguistic needs of each society and persons of all ages and backgrounds. We recognize the need to scale up international cooperation and financing for capacity development in developing countries and to support the development of local content and content relevant to local realities online and retain talent.

13. We commit by 2030 to:

(a) Establish and support national digital skills curricula and provide for adult training programme coverage of basic digital skills for as many as advanced digital skills (SDGs 4 & 5);

(b) Increase the availability, accessibility and software and educational curricula in diverse interfaces for persons with disabilities (SDGs

(c) Target and tailor capacity-building for women, persons with disabilities, migrants, and Peoples and those in vulnerable situations, and implementation of programmes (SDGs 5

## Global Digital Compact

characteristics relevant in national contexts, to identify learning gaps and inform priorities in specific contexts (SDGs 5 & 10);

(e) Prioritize and set targets for the development of digital competencies of public officials and institutions to enact, develop and implement strategies and policies for inclusive, secure and user-centred digital public services, including the development of skills and capacity to ensure the safe, secure and resilient functioning of digital systems, networks and data (SDG 16);

(f) Develop vocational, upskilling and reskilling training for workers in occupations impacted by digitalization and automation to mitigate potential negative consequences for workforces and promote decent work (SDG 8);

(g) Develop interoperable digital competency frameworks and training standards to facilitate pooling of training resources, the mobilization of public and private funds in support of capacity-building and its continuous adaptation to address rapid technological change and the prevention of brain drain (SDGs 4 & 17);

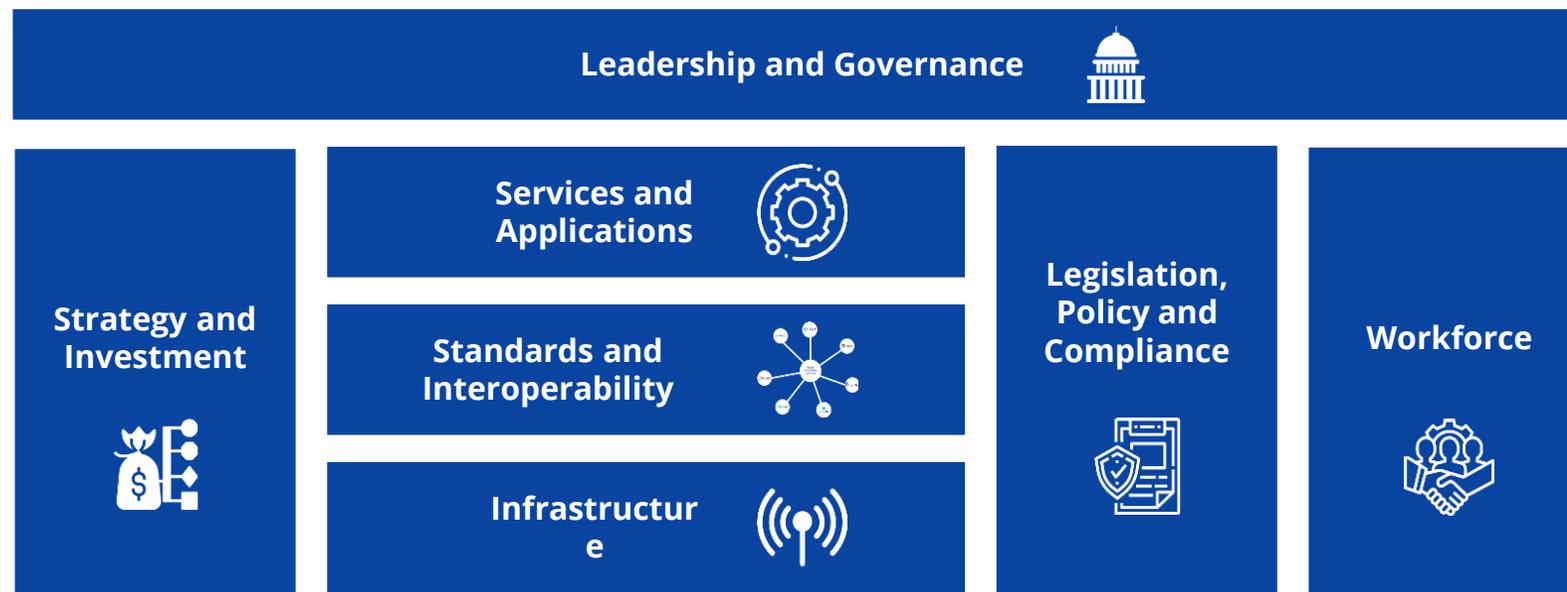

## Global Digital Compact

# Breakdown by WHO/ITU eHealth Component

Globally, across the seven components of the WHO/ITU eHealth Strategy Framework, most components are in phase 3, with the exception of Workforce which is in phase 2, and Leadership and Governance which is in phase 4.

# GIDH

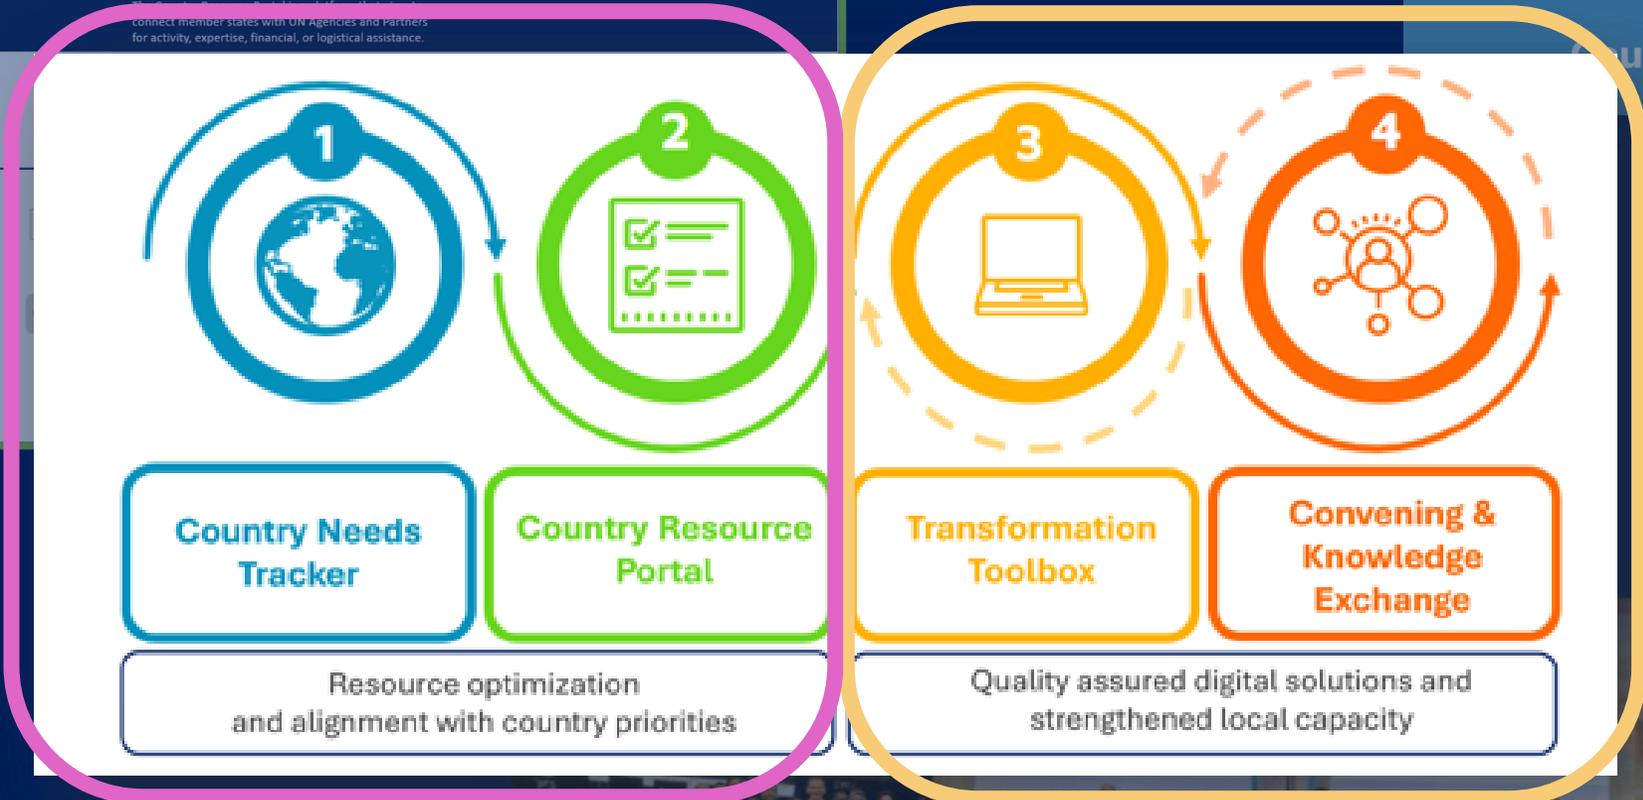

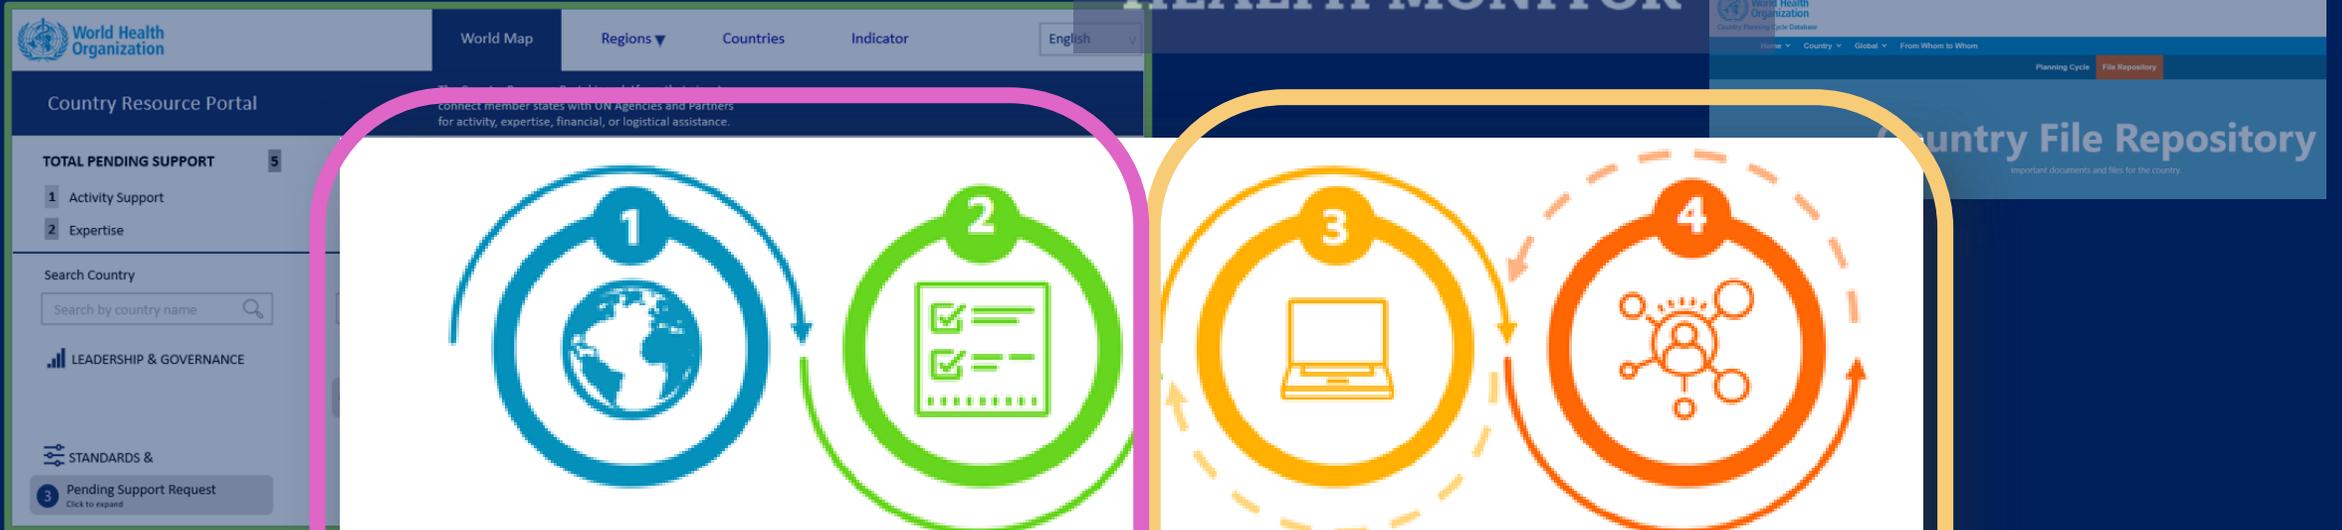

GLOBAL INITIATIVE ON DIGITAL HEALTH

## Mission

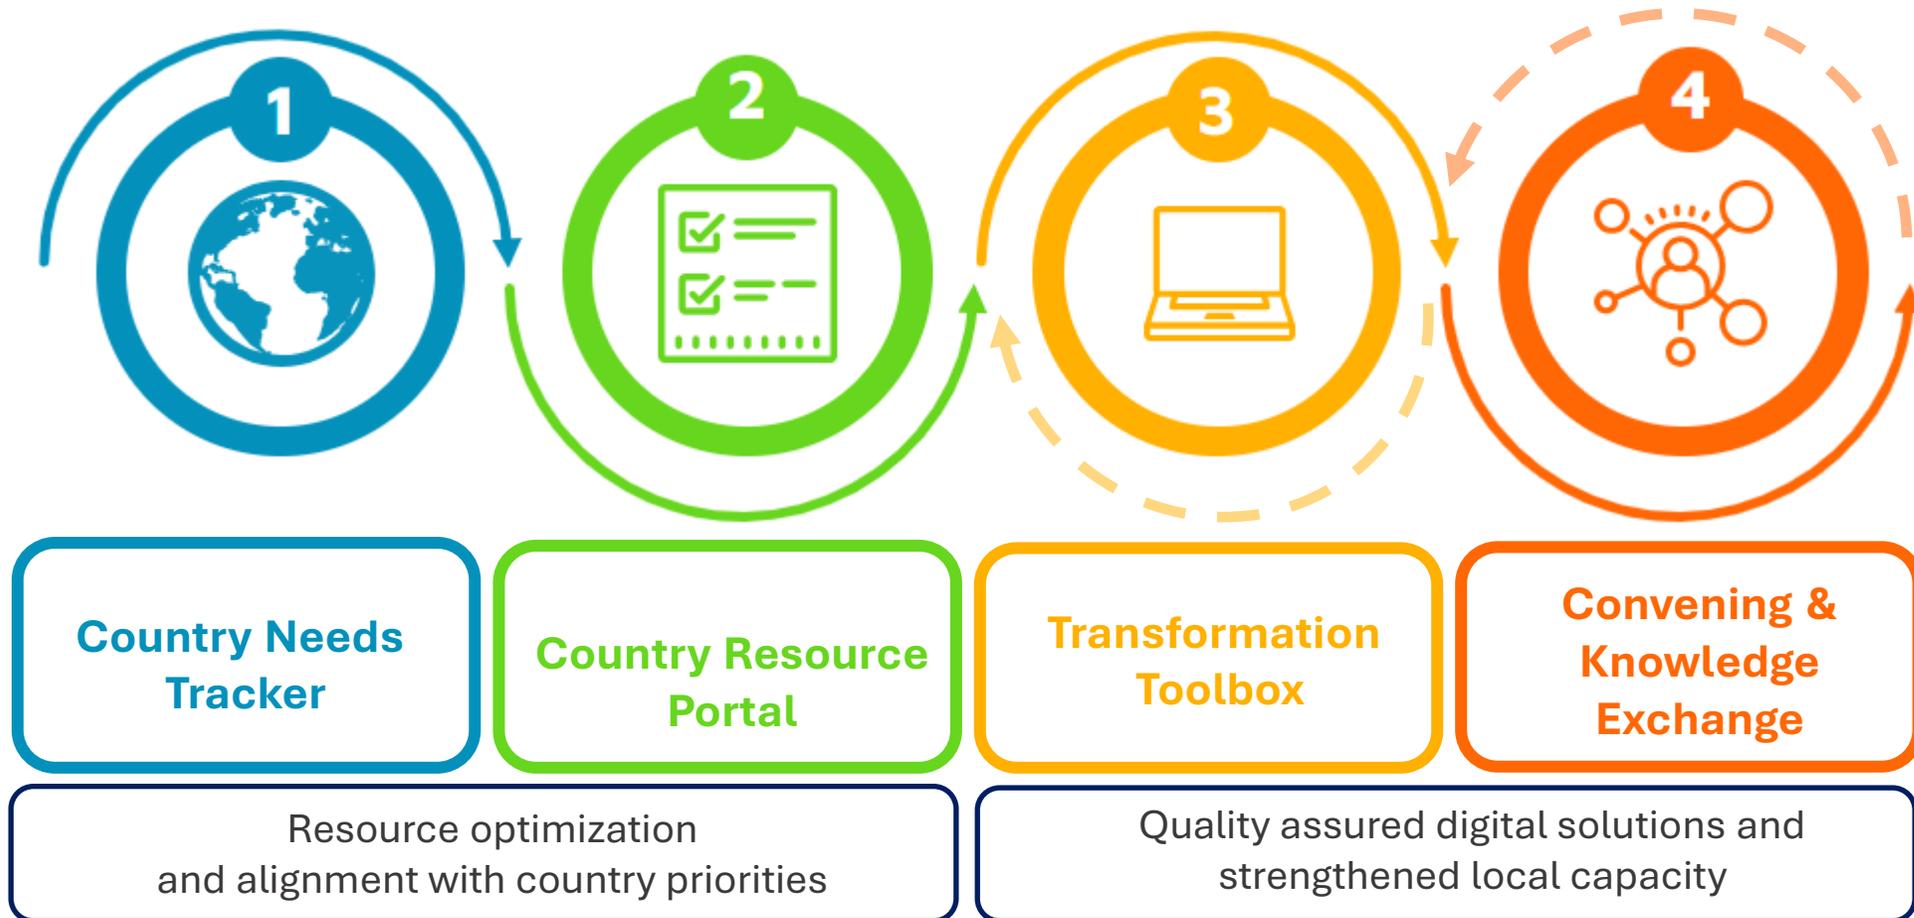

*Foster improved alignment in the digital health sector, providing governments and partners tools, building blocks, and platforms needed for sustainable health system digitalization.*

# Anchored in four pillars

## GLOBAL DIGITAL HEALTH MONITOR

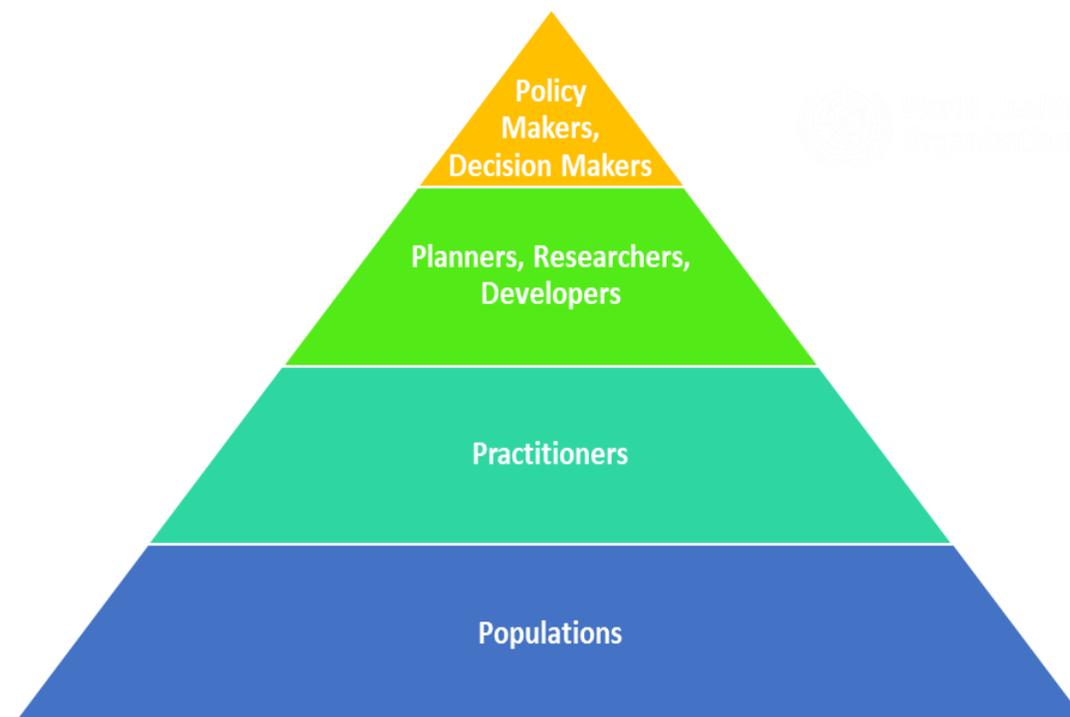

# Global Digital Health Competency Framework in GIDH

# Purpose and Audience

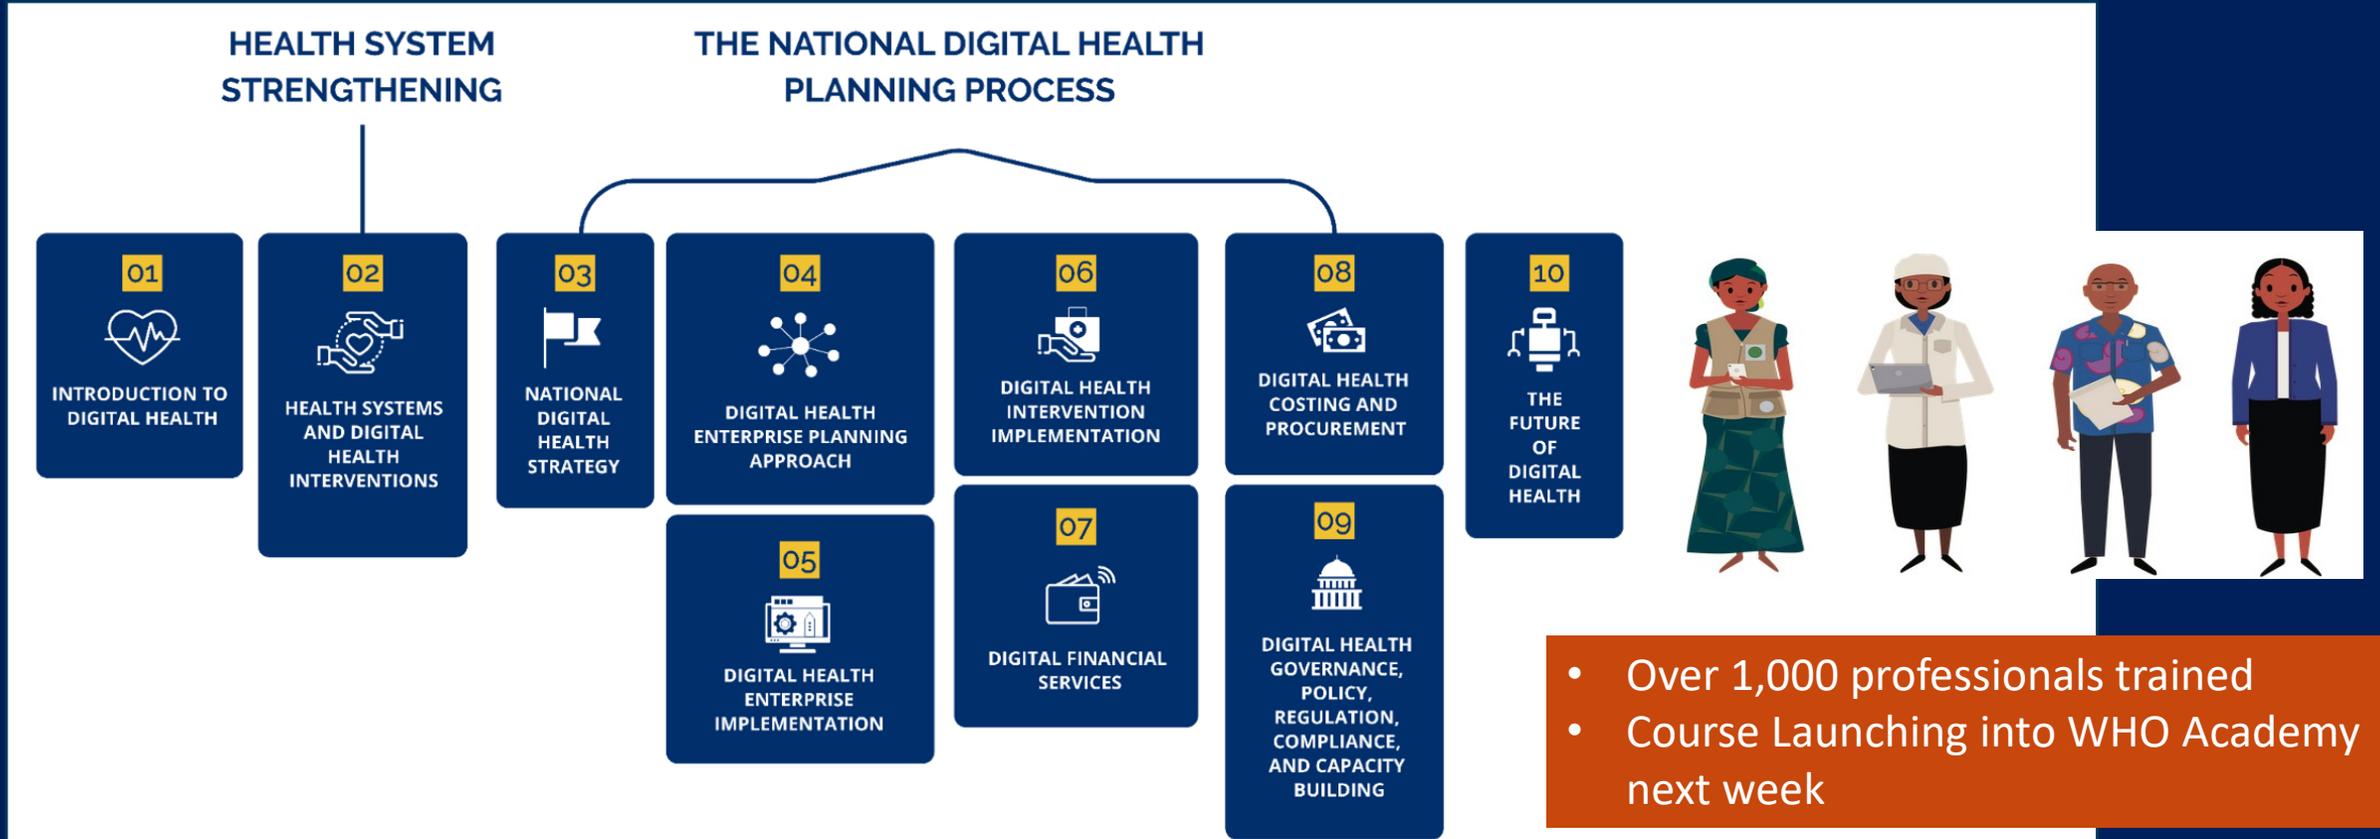

1. The WHO DHCF aims to strengthen digital health capacity at country level

*“The framework will outline competencies for digital health policy makers, program planners or managers, health practitioners and patients / populations. It will guide curriculum developers, digital health leaders, digital health practitioners and others in using and implementing digital health solutions, systems and services” [WHO GSDH]*

# Building capacity for national digital health planners through training

Digital Health : Planning National Systems  
Course

# Takeaway - Digital & AI can **ENABLE** health systems to:

## 1. Establish Trusted Personal Health Records

“every person has a right to their own health record”

## 2. Ensure Quality and Continuity of Care

“health workers have access to up-to-date care protocols and patient history”

## 3. Improve Efficiencies in Financing and Tracking Payments

“financial planning and protection for health system users”

## 4. Optimize Supply Chain Management

“no more stock outs”

## 5. Build a Future-Proof, Digitally Capable Health Workforce

“Timely Pay, Proven Skills, Continuous Growth”

## 6. Integrate Artificial Intelligence to support health systems and people

“Responsible AI that is safe, effective and locally appropriate”

## 7. Strengthen Public Health Planning, Surveillance and Response Systems

“Timely detection, assessment, reporting and action for climate and public health risks”
