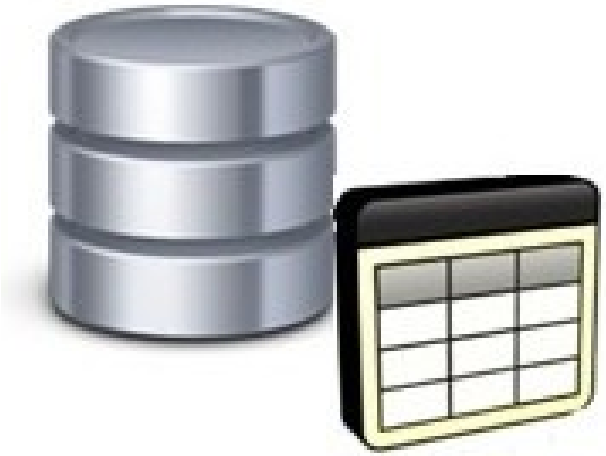
BIG DATA INSTITUTE

A Data System to Support Smart Financing

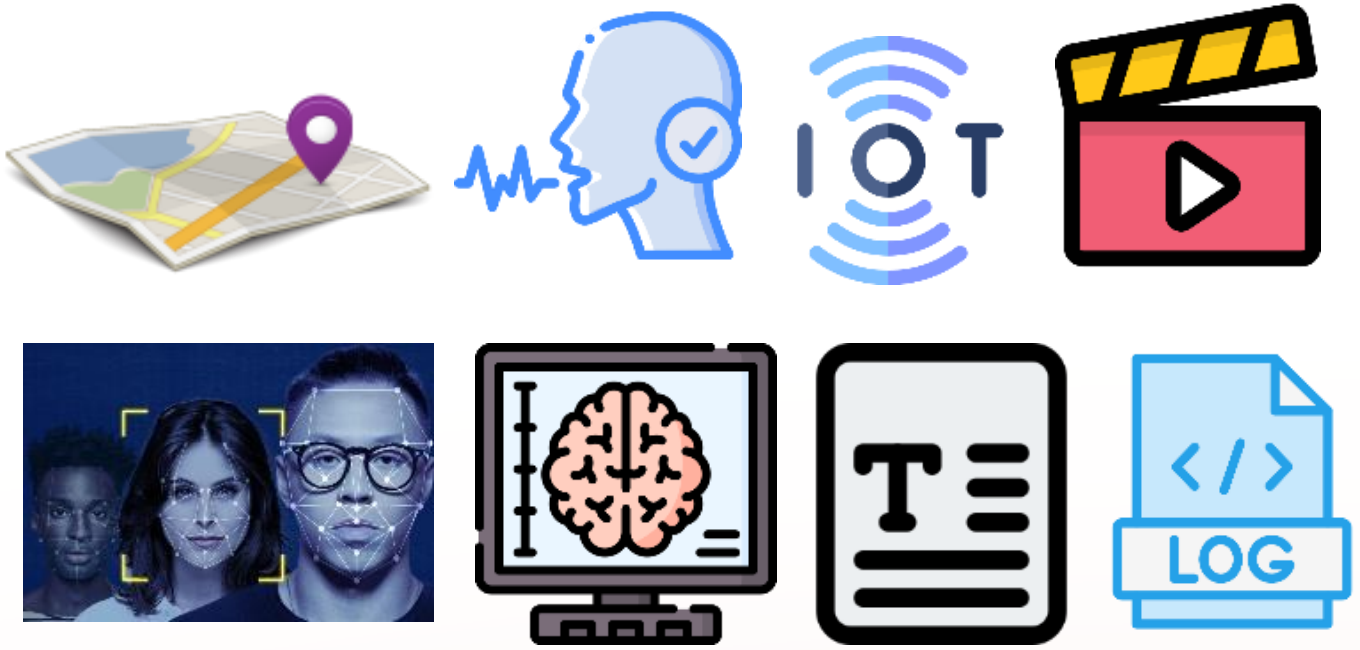
Assoc.Prof.Dr.Tiranee Achalakul

President, Big Data Institute (Public Organization)

All types of Data Used in Healthcare



Structured



Unstructured

Without a digital framework that allows smooth data linkage, there can be duplication of diagnostic tests, prescriptions, and overlapping care.

BIG DATA INSTITUTE

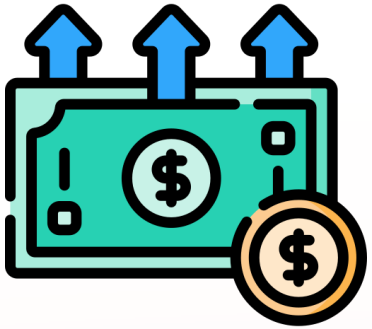
Why is a Data System Needed for UHC?

Digital health is an enabler of accelerating progress towards health equality

Improve health data Access and Share

Strengthen Primary Healthcare

Improve Pandemic Response



Increase Transparency

BIG DATA INSTITUTE

Challenges in Countries with Fragmented Healthcare Systems

Healthcare data are governed by complex rules and legal requirements that can be difficult to create a single data system

Data governance to work under Personal Data Protection Act

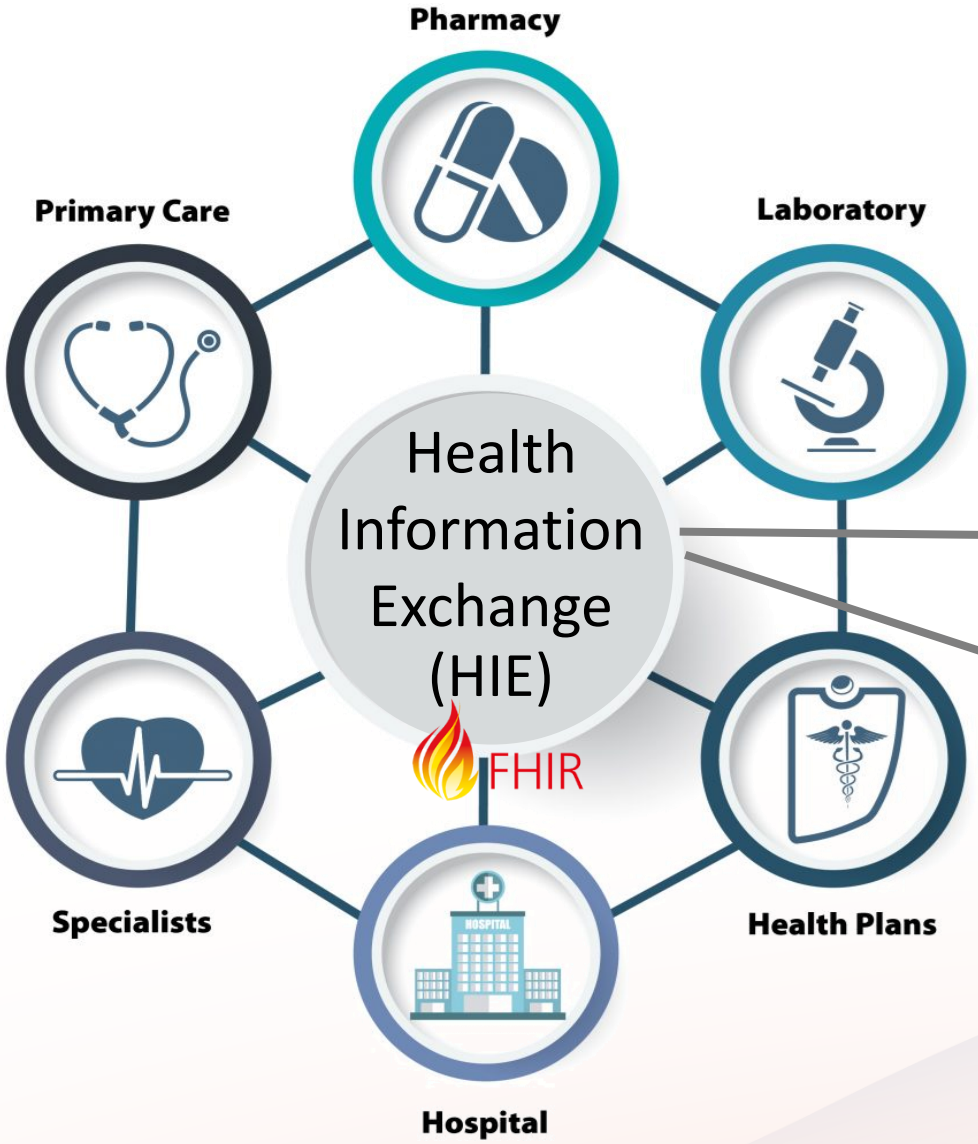
Multiple Hospital Information Systems

Hospital Information System (HIS)

HIS-A

HIS-B

HIS-C



Personal Health Record (PHR)

Telemedicine

Hospital Information System (HIS)

BIG DATA INSTITUTE

Health Link

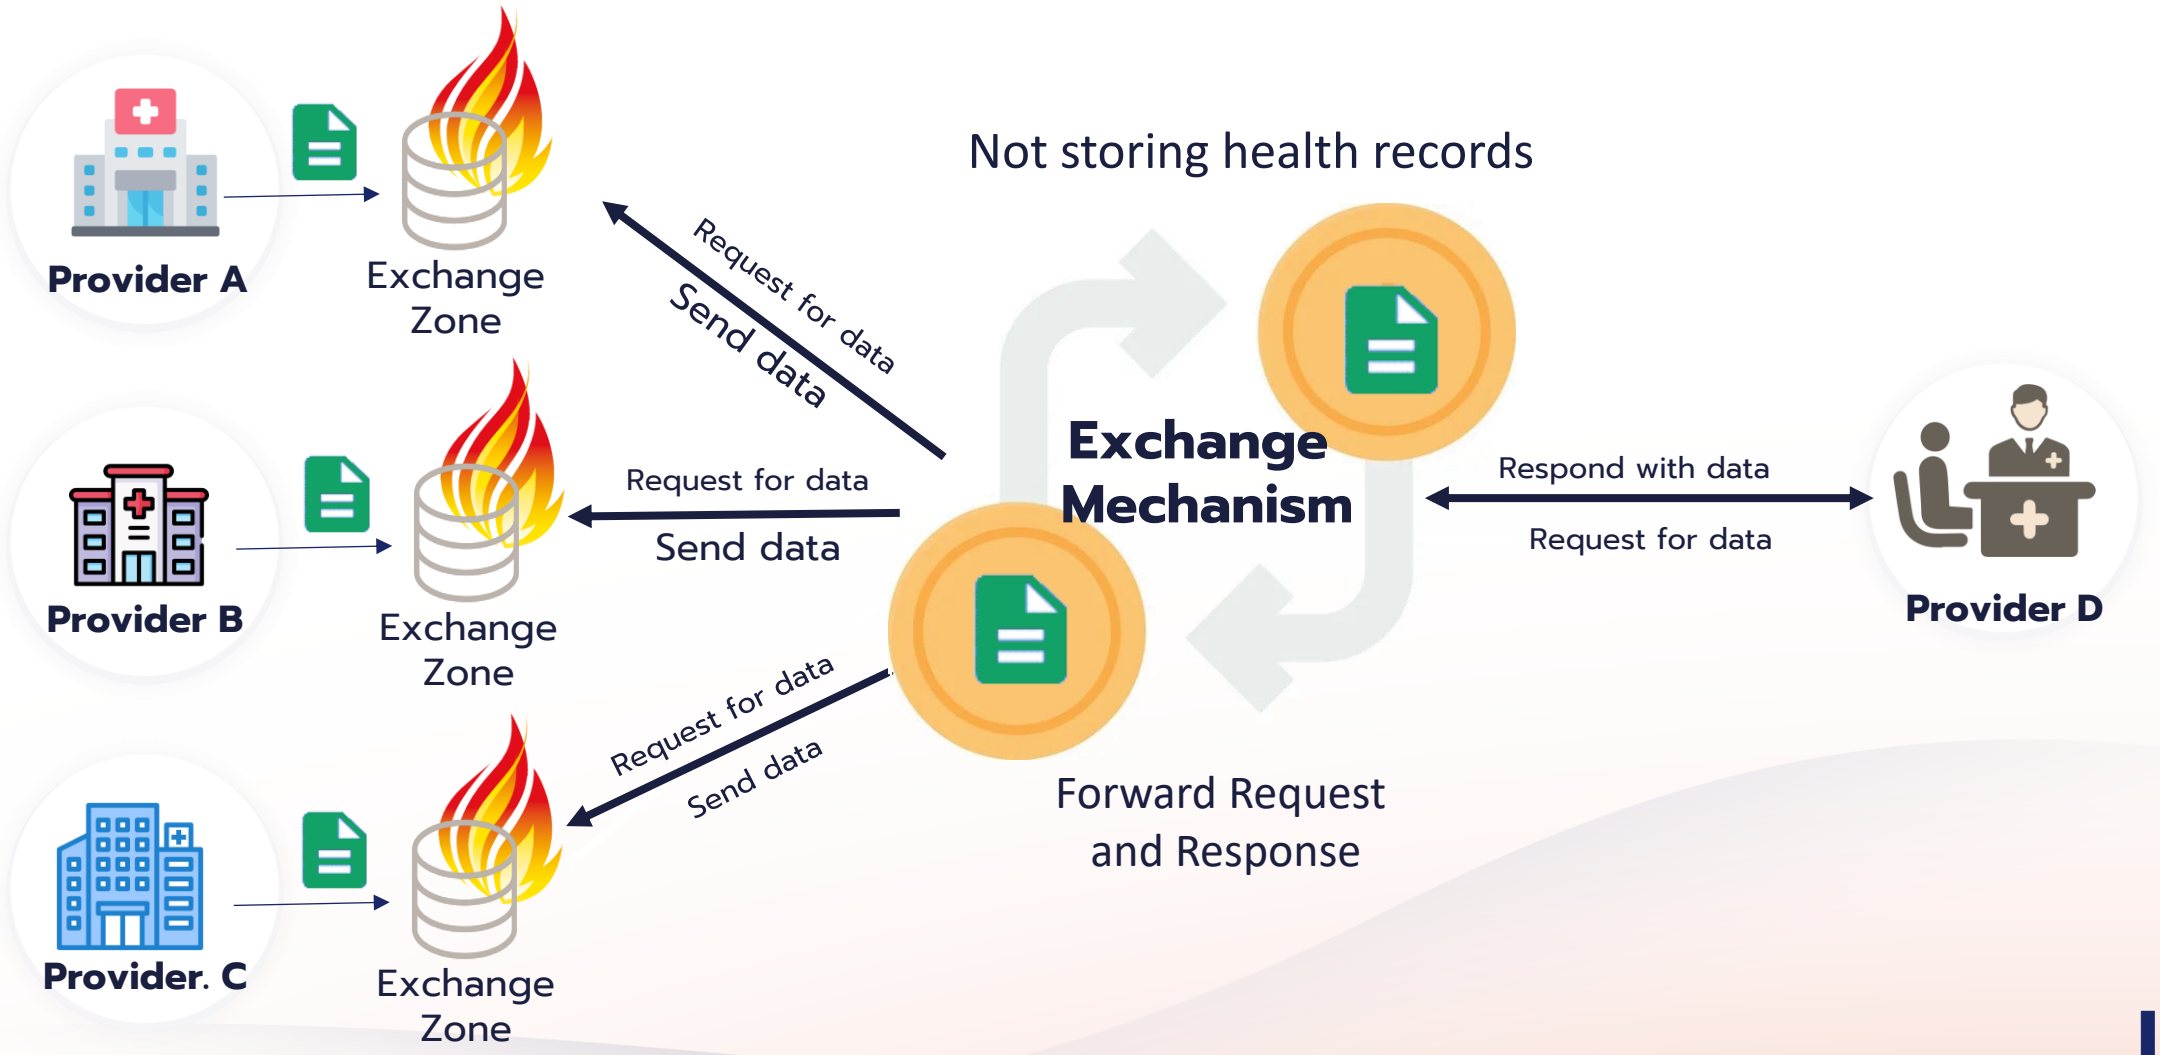
Health Link API Specification

- **Health Link : HIE**
- Health Link : Refer (BKK)
- Health Link : PHR API
- NHSO National Health Security Office — Medication Claim Redundancy Check

BIG DATA INSTITUTE

Health Link HIE

Decentralized Model

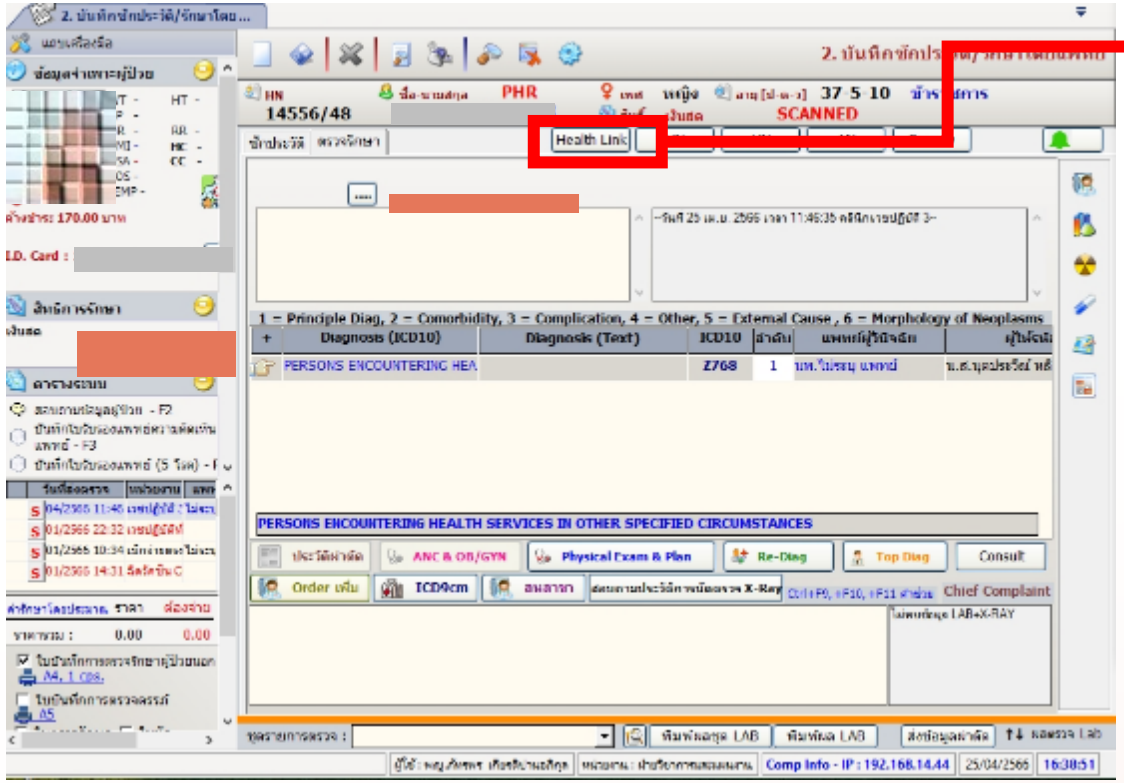


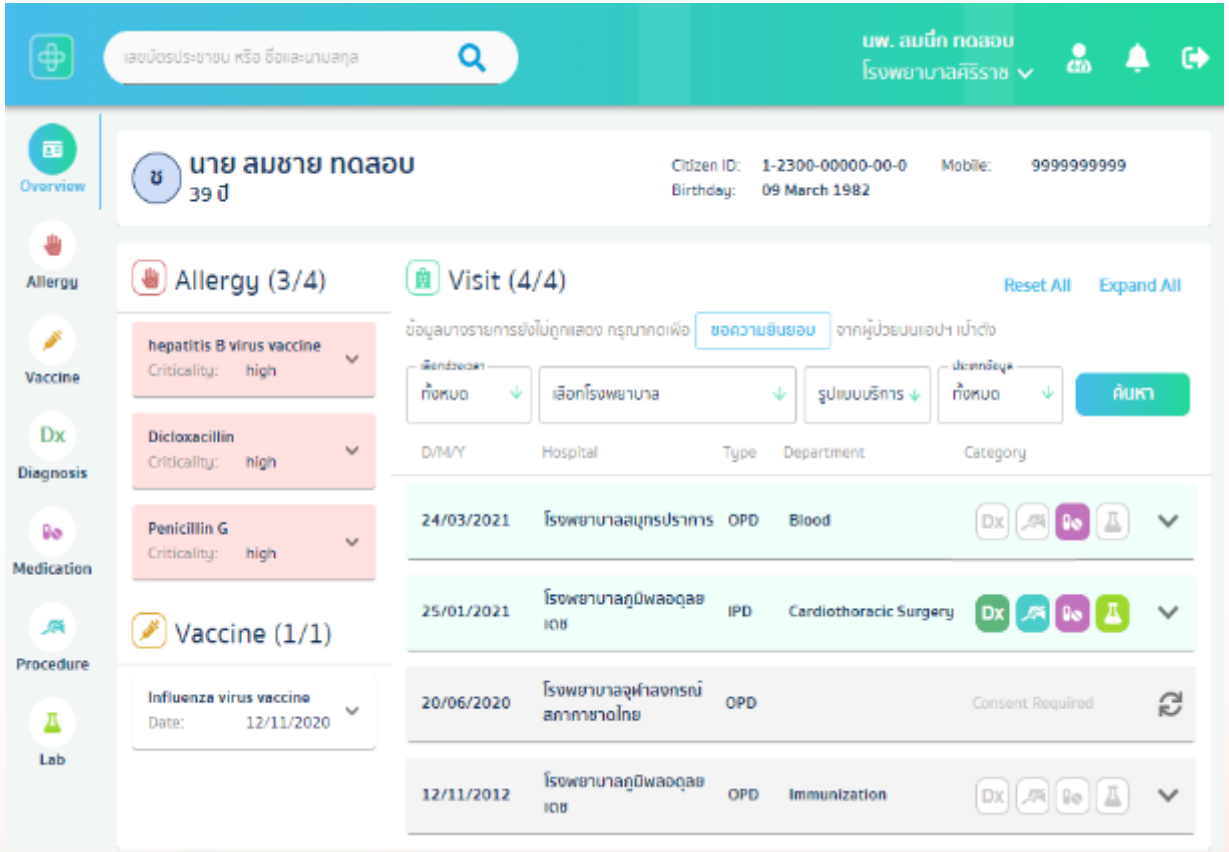
BIG DATA INSTITUTE

Information Delivery to Doctors and Pharmacists

BIG DATA INSTITUTE

Health records from other hospitals can be retrieved instantly from HIS (Hospital Information System).





Health Link
Electronic Referral

E-Refer

- Symptom summary and early diagnosis
- Referral No.

Primary Care

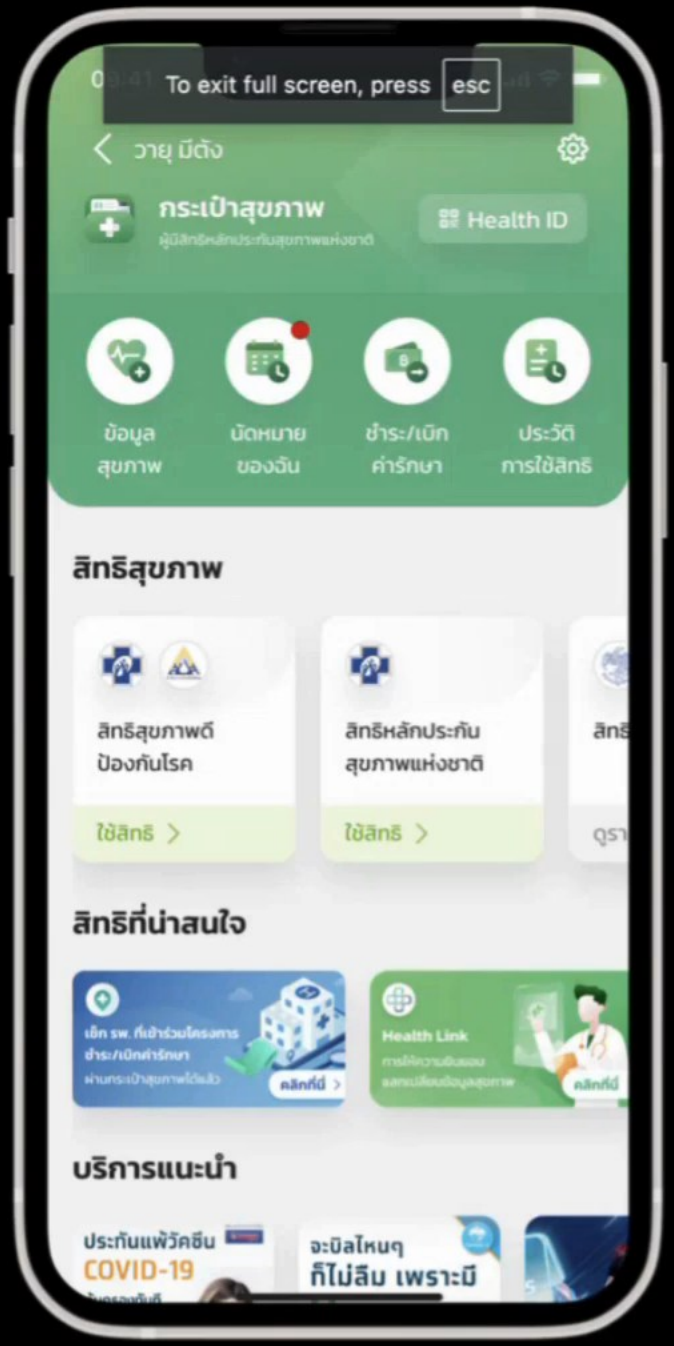
Patient Health Record

Health Link

Secondary Care

BIG DATA INSTITUTE

Health Link PHR



Data-driven for Health Promotion

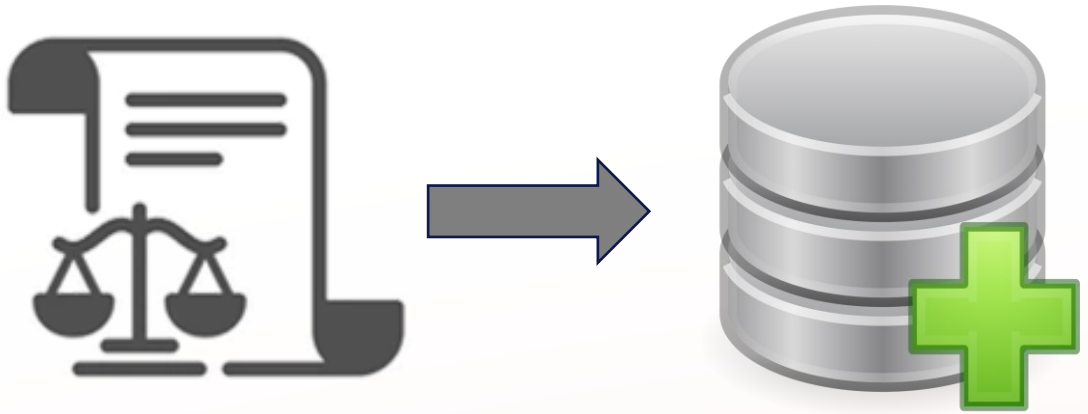
Develop tailored prevention and promotion plans against NCDs for each area in Bangkok

Plan house visits for individuals with health issues and plan recommendations for healthy people in each area.

Collect behavioral and environmental data across the country and correlate with patient claims for area-based health promotion strategies

Assess budget allocations for health initiatives to optimize spending efficiency and balance budget planning aimed at reducing patient numbers

Law that allows data integration across legal entities with simple governance rules



BIG DATA INSTITUTE
