**HARNESSING TECHNOLOGIES IN AN AGE OF AI TO BUILD A HEALTHIER
WORLD**

| BACKGROUND

Rapid technological advancements, including those involving Artificial Intelligence (AI), are deemed essential tools for creating a healthier, more equitable, and peaceful world. Inventive use of technologies to achieve the Sustainable Development Goals (SDGs) by 2030 has demonstrated significant benefits, for example by contributing to global environmental sustainability and biodiversity preservation. However, it is also crucial to consider the potential risks associated with these innovations, such as security threats, misinformation, disinformation, inequitable access, and privacy invasion.

The PMAC 2025 emphasizes leveraging these technological advancements to ensure equitable, affordable, and comprehensive access for all populations, especially in low- and middle-income countries and for resource-constrained individuals in high-income countries.

| OBJECTIVES

To set the scene of the PMAC 2025 in highlighting the importance of synergizing technologies to strengthen health systems, achieve the SDGs, and foster a healthy planet. Key issues such as climate change, conflict, and emerging diseases will be addressed

Panelist / Panelist

Meg Davis

Professor on Human Rights and Digital Health

University of Warwick
United Kingdom

Professor Sara (Meg) Davis is professor of Digital Health and Rights at the University of Warwick's Centre for Interdisciplinary Methodologies, and the principal investigator of the Digital Health and Rights Project, an international research and advocacy consortium. She has over twenty years' experience in global health and human rights as a scholar and practitioner, and is the author of two books, most recently *The Uncounted: Politics of data in global health* (Cambridge 2020). She earned her PhD at the University of Pennsylvania and held postdoctoral fellowships at Yale University and UCLA. She was China researcher at Human Rights Watch, and founding executive director of Asia Catalyst, which trained hundreds of community-based organizations on governance and human rights. At the Global Fund to Fight AIDS, TB and Malaria, Dr. Davis led early work to operationalise the Fund's commitments on human rights. She has held visiting fellowships at New York University, Columbia University, and Fordham University and taught at the Geneva Centre for Humanitarian Studies, University of Alabama at Birmingham, Temple University, Yale University, and University of Pennsylvania. Her consulting clients have included UNDP, UNAIDS, IFRC, ICRC, Global Fund Board delegations, and civil society networks. In 2017, she was one of three winners of the International Geneva Award.
